About Shoviv NSF Splitter

NSF Splitter tool is very useful for Lotus notes. Sometimes when you open your NSF file in Lotus notes it can not response and open NSF file or may be taken more time to open NSF file due to large NSF file size.

These options are given below:

By Size: You can split your NSF file according to size. You can give the size in MB and GB. In MB size between 100 MB and 51200 MB and in GB size between 1GB and 50 GB. If created NSF file's size exits your given file size then tool creates new NSF file and copy remaining on it.

By Date: If you want to copy data of only specific date range then you can select this option and your given date range data will copy in a new single NSF file.

By Year: If you want to copy data of only specific year range then you can select this option and your given year range data will copy in new single NSF file.

Selected Folder in Single NSF: If you want to save selected folder in a single NSF then you can select this option.

Selected Folder in Multiple NSF: If you want to save your single folder in a single NSF file then you can use this option. If you select inbox, sent items, calendars, contact folders then the tool creates each folder of NSF file means inbox folder data copy in first NSF inbox and sent item data copy in second thing.

In Status: In the status section, you can see the status of the current process or all processes in report format. Through the status, you can see in a particular folder how many items to copy, counts and running status of a particular folder and in which NSF folder data copy.
